

Abdullah Bin Waqar

AI Engineer

+923080333213 abduallahbw.tech@gmail.com

 <https://www.linkedin.com/in/abdullah-bin-waqar-bbab90275/>

Aspiring AI Engineer with a strong foundation in programming (C++, Python, JavaScript) and hands-on experience in machine learning, deep learning, and computer vision. Skilled in data analysis using Pandas and NumPy, with practical knowledge of LLMs, RAG systems, and OpenCV. Developed multiple AI and data-driven projects, including brain tumor detection and NLP-based chatbot Microsoft-certified in AI and completed formal training at Corvit Systems. Recently interned at CyberGen, applying AI skills in real-world model training and analysis.

SKILLS:

Programming Languages	Machine Learning & Deep Learning	Database Management	Tools & Frameworks
- C++ - Python - JavaScript, - C	- Machine Learning (ML), Deep Learning (DL) - Convolutional Neural Networks (CNNs) - Computer Vision with OpenCV - Data Analysis using NumPy and Pandas - Generative AI - RAG (Retrieval-Augmented Generation) - LLM (large language models)	- MySQL - SQL Server	- GitHub - Django - WordPress - Microsoft Power BI - Tableau - Microsoft Excel

Experience:

AI Engineer at Beetle InfotechLLC	Aug2025 -- present
AI Engineer Intern at CyberGen	April2025 -- Jun2025

Projects:

AI-Powered Hospital Management System

Built a MERN-based hospital management system with an AI chatbot for doctor assistance, featuring patient management, appointments, medical records, and intelligent healthcare support.

Brain Tumor Detection and Masking System

Developed a deep learning system using CNNs and OpenCV to detect and segment brain tumors from MRI scans. Trained on public datasets, it highlights affected regions to aid early diagnosis and support radiologists.

Data Analysis using Pandas and NumPy

Performed data analysis with Python (Pandas, NumPy), focusing on cleaning, transforming, and visualizing structured data. Applied statistical methods and built EDA scripts to uncover trends and insights.

Tic-Tac-Toe Game

Built a multiplayer Tic-Tac-Toe game using OOP principles and deployed it online for interactive play.

Link: <https://abdullahproject.github.io/Tic-Tac-Toe/>

Calculator Application in C++

Created a C++ command-line calculator with input validation and error handling for smooth basic arithmetic operations.

Education:

VirtualUniversity of Pakistan
BachelorofScience in ComputerScience

Certifications:

AI(MachineLearning & Deep Learning) Training Corvit Lahore (Completed ; May, 2025)
Practical training focused on ML, DL, Computer Vision, and NLP. Worked on Generative AI, LLMs, and Retrieval-Augmented Generation (RAG) systems. Gained hands-on experience with real-world AI tools and frameworks like CNNs, OpenCV, and Transformers.

AI(ML/DL) certifications microsoft (earned Jun 2025)
Completedan AlcoursefromCorvit SystemsandsuccessfullypassedtheMicrosoftcertificationexam, demonstrating skills in ML, computer vision, and NLP.

Programming Essentials in C++ Cisco Networking Academy (Completed: July 8, 2023)

Covered core concepts of programming, object-oriented design, and algorithmic thinking in C++.
